

ST. BERNARDINE
OF SIENA CATHOLIC SCHOOL

COVID-19 Prevention Program (CPP)

COVID-19 Prevention Program (CPP) for St. Bernardine of Siena School

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

Date: February 2, 2021

Authority and Responsibility

Katy Kruska, Principal has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.
- Shared surfaces and high touch areas are regularly cleaned and disinfected by users throughout the day as well as the maintenance staff at the end of the day.
- Students or staff may not use drinking fountains and are asked to bring a reusable water bottle every day. Aides will be responsible for using the water bottle filling stations and cleaning after each use.
- St. Bernardine School utilizes a disinfecting fogger at the end of the day in classrooms, offices, bathrooms, faculty lounge, and faculty work room.
- Bathrooms are sprayed throughout the day with disinfecting spray.
- Teachers and staff will prepare individual material packets for students to limit sharing. This includes classroom supplies such as pencils, crayons, scissors, etc.; learning manipulatives; and promoting activities at recess that limit contact and sharing of equipment. If items have been shared, they will be cleaned between uses, and students will be required to wash their hands. Teachers and staff will use buckets or bins to keep disinfected items sorted from those that have been used and need cleaning.

Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by reporting to the principal any areas or rooms that are not properly cleaned or any areas in violation of the policies set forth by the Department of Public Health. Employees must wear face masks. Face shields are also available for use by staff.

Employee screening

Prior to arriving at school, all employees must fill out a Google Form for their daily health check. Upon arriving to school, employees must have their temperature taken in the school office. If an employee presents with signs or symptoms of COVID-19, they are asked to stay home. Any employee with a temperature of 99.5 or above will be sent home.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

- The administration, faculty and staff, and maintenance staff will routinely inspect and monitor all physical work spaces and structures and report any hazards or violations to the principal to remedy the hazard.
- The administration, faculty and staff, and maintenance staff will routinely monitor the cleaning and disinfecting protocols, healthy hygiene practices, PPE supplies, cohorting protocols, and physical distancing and movement around campus.

Control of COVID-19 Hazards

Physical Distancing

Where possible, we ensure at least six feet of physical distancing at all times in our workplace by:

- Teachers and staff in Grades 3-8 are able to work from home.
- Teachers who are considered to be at “high risk” or in the “vulnerable” category will be given opportunities to work from home when possible.
- Visitors (including school parents) are restricted from entering the school campus. There is a table by the pedestrian gate for parents to leave any materials students may need. During drop-off and dismissal, parents are not allowed to exit their cars.
- Signs and floor markings for physical distancing are displayed around the school campus.
- Signs with reminders of healthy hygiene practices are posted around the school buildings.
- Teachers will not share classrooms, except with their cohort’s instructional aide.
- Faculty and staff have been assigned specific restrooms to use. Employees may not congregate in the faculty lounge.
- Teachers and instructional aides will have staggered break times.
- If six feet distancing cannot take place, staff meetings will occur outside or virtually.
- Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. All adults on campus must wear masks and adhere to the guidance for facial coverings. For staff, CDPH guidelines state that, "All staff must use face coverings in accordance with CDPH guidelines unless California Division of Occupational Safety and Health Administration (Cal/OSHA) standards require respiratory protection" (p.8) It also states that, "In limited situations where a face covering cannot be used for pedagogical or developmental reasons, (i.e. communicating or assisting young children or those with special needs) a face shield can be used instead of a cloth face covering while in the classroom as long as the wearer maintains physical distance from others, to the extent practicable. Staff must return to wearing a face covering outside of the classroom." (p. 8) Thus, all staff are required to wear face coverings.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees wearing respiratory protection in accordance with CCR Title 8 section 5144 or other safety orders.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly be performed with a face covering, where employees will be kept at least six feet apart.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.

Engineering controls

We implement the following measures for situations where we cannot maintain at least six feet between individuals: plexiglass dividers are placed at each student and staff desk, regardless of distance. When classrooms cannot be arranged with proper physical distancing, other areas on campus will be used (i.e. lunch pavilion, courtyard, breezeway). Weather permitting, some classes can be moved outside to ensure adequate distancing.

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- The ventilation system is and will be properly maintained by Controlled Aire, the school's HVAC company.
- The HVAC will operate throughout the day and will be set to maximize the introduction of fresh air.
- Classroom doors and windows will be propped open for ventilation.
- Smaller and poorly ventilated classrooms and work spaces will not be used.
- Students will face the same direction or will stagger seating to limit face to face interaction.

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces: The school has sourced from its janitorial supply company EPA-registered products. The school custodians have been trained in best practices for cleaning and disinfecting and [has reviewed the latest guidance for cleaning and disinfecting public spaces](#). We will continue to review procedures on a monthly basis to ensure that the school is staying informed of the most current guidance. We will use a ULV disinfectant sprayer in bathrooms, classrooms, play structure, and around outdoor tables/benches. To the extent possible, the school has removed soft surfaces from classrooms such as cushions and area rugs. Employees are asked to wipe down their own workspaces daily and more frequently, if needed.

Teachers and staff will prepare individual material packets for students to limit sharing. This includes classroom supplies such as pencils, crayons, scissors, etc.; learning manipulatives; and promoting activities at recess that limit contact and sharing of equipment. If items have been shared, they will be cleaned between uses, and students will be required to wash their hands. Teachers and staff will use buckets or bins to keep disinfected items sorted from those that have been used and need cleaning.

Staff will clean and disinfect high-touch surfaces and high-traffic spaces frequently throughout the day. These surface areas include, but are not limited to:

Category	Frequency
Restrooms & Water Bottle Filling Stations	Three times/day
Workspaces (teachers' desks and office desks)	At end of each use and/or daily
Electronic Equipment	At end of each use and/or daily
High Touch Surfaces (i.e., door handles, faucets, light switches, water filling stations)	At the end of each use
Appliances (i.e., refrigerator/microwave handles)	Daily
Common Areas	At end of each use and/or daily
Office Reception Area (i.e., countertop, pens, payment drop box)	At end of each use and/or daily

Hand sanitizer, disinfecting wipes and cleaning supplies are available in every classroom and office.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

- Areas in which infected persons have worked will be closed off. Windows and ventilation in the exposed areas will increase circulation. After waiting 24 hours, the workspace of the infected individual will be cleaned by maintenance staff. The entire property will be deep cleaned.

Shared tools, equipment and personal protective equipment (PPE)

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be immediately disinfected between uses by faculty and staff.

Hand sanitizing

In order to implement effective hand sanitizing procedures, we have:

- designated bathroom zones for faculty and staff for regular use and for hand washing.
- signs displayed around campus describing proper and healthy hygiene practices.
- hand sanitizer available in every classroom and at every entrance into the school building.
- encouraging, reminding, and allowing time for employee handwashing for at least 20 seconds each time.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained.

Investigating and Responding to COVID-19 Cases

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

- Offered COVID-19 testing at no cost during work hours. St. Bernardine School has partnered with PMH Laboratory for surveillance testing of all faculty and staff members. Immediate family members of employees may be tested at no cost as well.
- Staff that does not wish to use PMH Laboratory for testing may choose to test with a health care provider of their choosing.
- Anyone exposed to COVID-19 will be asked to quarantine at home in accordance with CDC and CADPH guidelines.

System for Communicating

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand. The faculty and staff have been provided with the St. Bernardine of Siena Return to School Plan, California Department of Public Health COVID-19 and Reopening to In-Person Instruction Framework, Public Health Guidance for K-12 Schools, and the Los Angeles County Department of Public Health Reopening Protocols for K-12 Schools. The plans and protocols detail the following:

- Employees should report COVID-19 symptoms and possible hazards to Katy Kruska.
- Employees can report symptoms and hazards without fear of reprisal.
- The procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.
- Dates for mandatory surveillance testing for employees are posted in the weekly Faculty/Staff Newsletter.
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test.
- Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

Training and Instruction

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.

Appendix D: COVID-19 Training Roster will be used to document this training.

Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related. This will be accomplished by employer-provided employee sick leave benefits, payments from public sectors or other means of maintaining earnings, rights and benefits, where permitted by law and when not covered by workers' compensation.
- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law and the Archdiocese of Los Angeles, and provide any related information requested.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
 - COVID-19 symptoms have improved.
 - At least 10 days have passed since COVID-19 symptoms first appeared.
- COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
- A negative COVID-19 test will not be required for an employee to return to work.
- If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.

Katy Kruska
Principal, St. Bernardine of Siena School
(818) 340-2130
kkruska@stbernardine.org

Appendix A: Identification of COVID-19 Hazards

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing fixed work locations.

Person conducting the evaluation: Katy Kruska

Date: February 2, 2021

Name(s) of employee and authorized employee representative that participated: Katy Kruska

Interaction, area, activity, work task, process, equipment and material that potentially exposes employees to COVID-19 hazards	Places and times	Potential for COVID-19 exposures and employees affected, including members of the public and employees of other employers	Existing and/or additional COVID-19 prevention controls, including barriers, partitions and ventilation
Classrooms, front office, restrooms, faculty lounge, faculty work room	7:20-3:30 p.m. Monday-Friday	None	All protocols are in place.

Appendix B: COVID-19 Inspections

Date: February 2, 2021

Name of person conducting the inspection: Katy Kruska

Work location evaluated: St. Bernardine of Siena School, Woodland Hills

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Engineering			
Barriers/partitions	X		
Ventilation (amount of fresh air and filtration maximized)	X		
Additional room air filtration	N/A		
Administrative			
Physical distancing	X		
Surface cleaning and disinfection (frequently enough and adequate supplies)	X		
Hand washing facilities (adequate numbers and supplies)	X		
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions	X		
Plexiglass barriers at all student desks, employee desks, and in school office	X		
Signage	X		
PPE (not shared, available and being worn)	X		
Face coverings (cleaned sufficiently often)	X		
Gloves	X		
Face shields/goggles	X		

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

Date: [enter date]

Name of person conducting the investigation: [enter name(s)]

Employee (or non-employee*) name:		Occupation (if non-employee, why they were in the workplace):	
Location where employee worked (or non-employee was present in the workplace):		Date investigation was initiated:	
Was COVID-19 test offered?		Name(s) of staff involved in the investigation:	
Date and time the COVID-19 case was last present in the workplace:		Date of the positive or negative test and/or diagnosis:	
Date the case first had one or more COVID-19 symptoms:		Information received regarding COVID-19 test results and onset of symptoms (attach documentation):	
Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):			

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:			
All employees who may have had COVID-19 exposure and their authorized representatives.	Date:		
	Names of employees that were notified:		
Independent contractors and other employers present at the workplace during the high-risk exposure period.	Date:		
	Names of individuals that were notified:		
What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?		What could be done to reduce exposure to COVID-19?	
Was local health department notified?		Date:	

*Should an employer be made aware of a non-employee infection source COVID-19 status.

Additional Consideration #1

Multiple COVID-19 Infections and COVID-19 Outbreaks

[This section will need to be added to your CPP if your workplace is identified by a local health department as the location of a COVID-19 outbreak, or there are three or more COVID-19 cases in your workplace within a 14-day period. Reference section [3205.1](#) for details.]

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing

- We will provide COVID-19 testing to all employees in our exposed workplace except for employees who were not present during the period of an outbreak identified by a local health department or the relevant 14-day period. COVID-19 testing will be provided at no cost to employees during employees' working hours.
- COVID-19 testing consists of the following:
 - All employees in our exposed workplace will be immediately tested and then tested again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine period required by, or orders issued by, the local health department.
 - After the first two COVID-19 tests, we will continue to provide COVID-19 testing of employees who remain at the workplace at least once per week, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
 - We will provide additional testing when deemed necessary by Cal/OSHA.

Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees who had COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria** requirements, and local health officer orders if applicable.

Investigation of workplace COVID-19 illness

We will immediately investigate and determine possible workplace-related factors that contributed to the COVID-19 outbreak in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.

COVID-19 investigation, review and hazard correction

In addition to our CPP **Identification and Evaluation of COVID-19 Hazards** and **Correction of COVID-19 Hazards**, we will immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review will be documented and include:

- Investigation of new or unabated COVID-19 hazards including:
 - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
 - Our COVID-19 testing policies.
 - Insufficient outdoor air.
 - Insufficient air filtration.
 - Lack of physical distancing.
- Updating the review:
 - Every thirty days that the outbreak continues.
 - In response to new information or to new or previously unrecognized COVID-19 hazards.
 - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and

review. We will consider:

- Moving indoor tasks outdoors or having them performed remotely.
- Increasing outdoor air supply when work is done indoors.
- Improving air filtration.
- Increasing physical distancing as much as possible.
- Respiratory protection.
- [describe other applicable controls].

Notifications to the local health department

- Immediately, but no longer than 48 hours after learning of three or more COVID-19 cases in our workplace, we will contact the local health department for guidance on preventing the further spread of COVID-19 within the workplace.
- We will provide to the local health department the total number of COVID-19 cases and for each COVID-19 case, the name, contact information, occupation, workplace location, business address, the hospitalization and/or fatality status, and North American Industry Classification System code of the workplace of the COVID-19 case, and any other information requested by the local health department. We will continue to give notice to the local health department of any subsequent COVID-19 cases at our workplace.

Additional Consideration #2

Major COVID-19 Outbreaks

[This section will need to be added to your CPP should your workplace experience 20 or more COVID-19 cases within a 30-day period. Reference section [3205.2](#) for details.]

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing

We will provide twice a week COVID-19 testing, or more frequently if recommended by the local health department, to all employees present at our exposed workplace during the relevant 30-day period(s) and who remain at the workplace. COVID-19 testing will be provided at no cost to employees during employees' working hours.

Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees with COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria**, and any relevant local health department orders.

Investigation of workplace COVID-19 illnesses

We will comply with the requirements of our CPP **Investigating and Responding to COVID-19 Cases**.

COVID-19 hazard correction

In addition to the requirements of our CPP **Correction of COVID-19 Hazards**, we will take the following actions:

- In buildings or structures with mechanical ventilation, we will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems would reduce the risk of transmission and implement their use to the degree feasible.
- We will determine the need for a respiratory protection program or changes to an existing respiratory protection program under CCR Title 8 section 5144 to address COVID-19 hazards.
- We will evaluate whether to halt some or all operations at our workplace until COVID-19 hazards have been corrected
- Implement any other control measures deemed necessary by Cal/OSHA.

Notifications to the local health department

We will comply with the requirements of our **Multiple COVID-19 Infections** and **COVID-19 Outbreaks-Notifications to the Local Health Department**.
